To: Consultants and Contractors Utilizing City of Springfield's Standard Drawing Details for Public Improvements

Re: Revised Standard Drawing Detail SS-4

The following revisions to Standard Drawing Detail SS-4 will become effective on July 1, 2007. We have coordinated with major foundries to have these rings and covers available to local suppliers on or before July 1. These changes will not increase the cost of these products.

1. Drawing SS-4 Type C Ring & Cover shall be replaced with Drawing SS-4-C changing the standard to Deeter #1157 Ring w/ #2018-A Cover, East Jordan Iron Works #2425Z Ring w/ #2408A Cover or equal and incorporating on the cover the design as shown and phrases "Upstream Starts Here" and "Protect Our Waterways".
2. Drawing SS-4 Type A Ring & Cover shall be replaced with Drawing SS-4-A changing the standard to Deeter #1258 Ring & Cover, East Jordan Iron Works #2420Z Ring w/ 2408A Cover, SS-4-C installed flange down or equal and incorporating on the cover the design as shown and phrases "Upstream Starts Here" and "Protect Our Waterways".

Sincerely,

Todd Wagner, P.E.
Principal Storm Water Engineer
